# ◀ PROFILE ▶

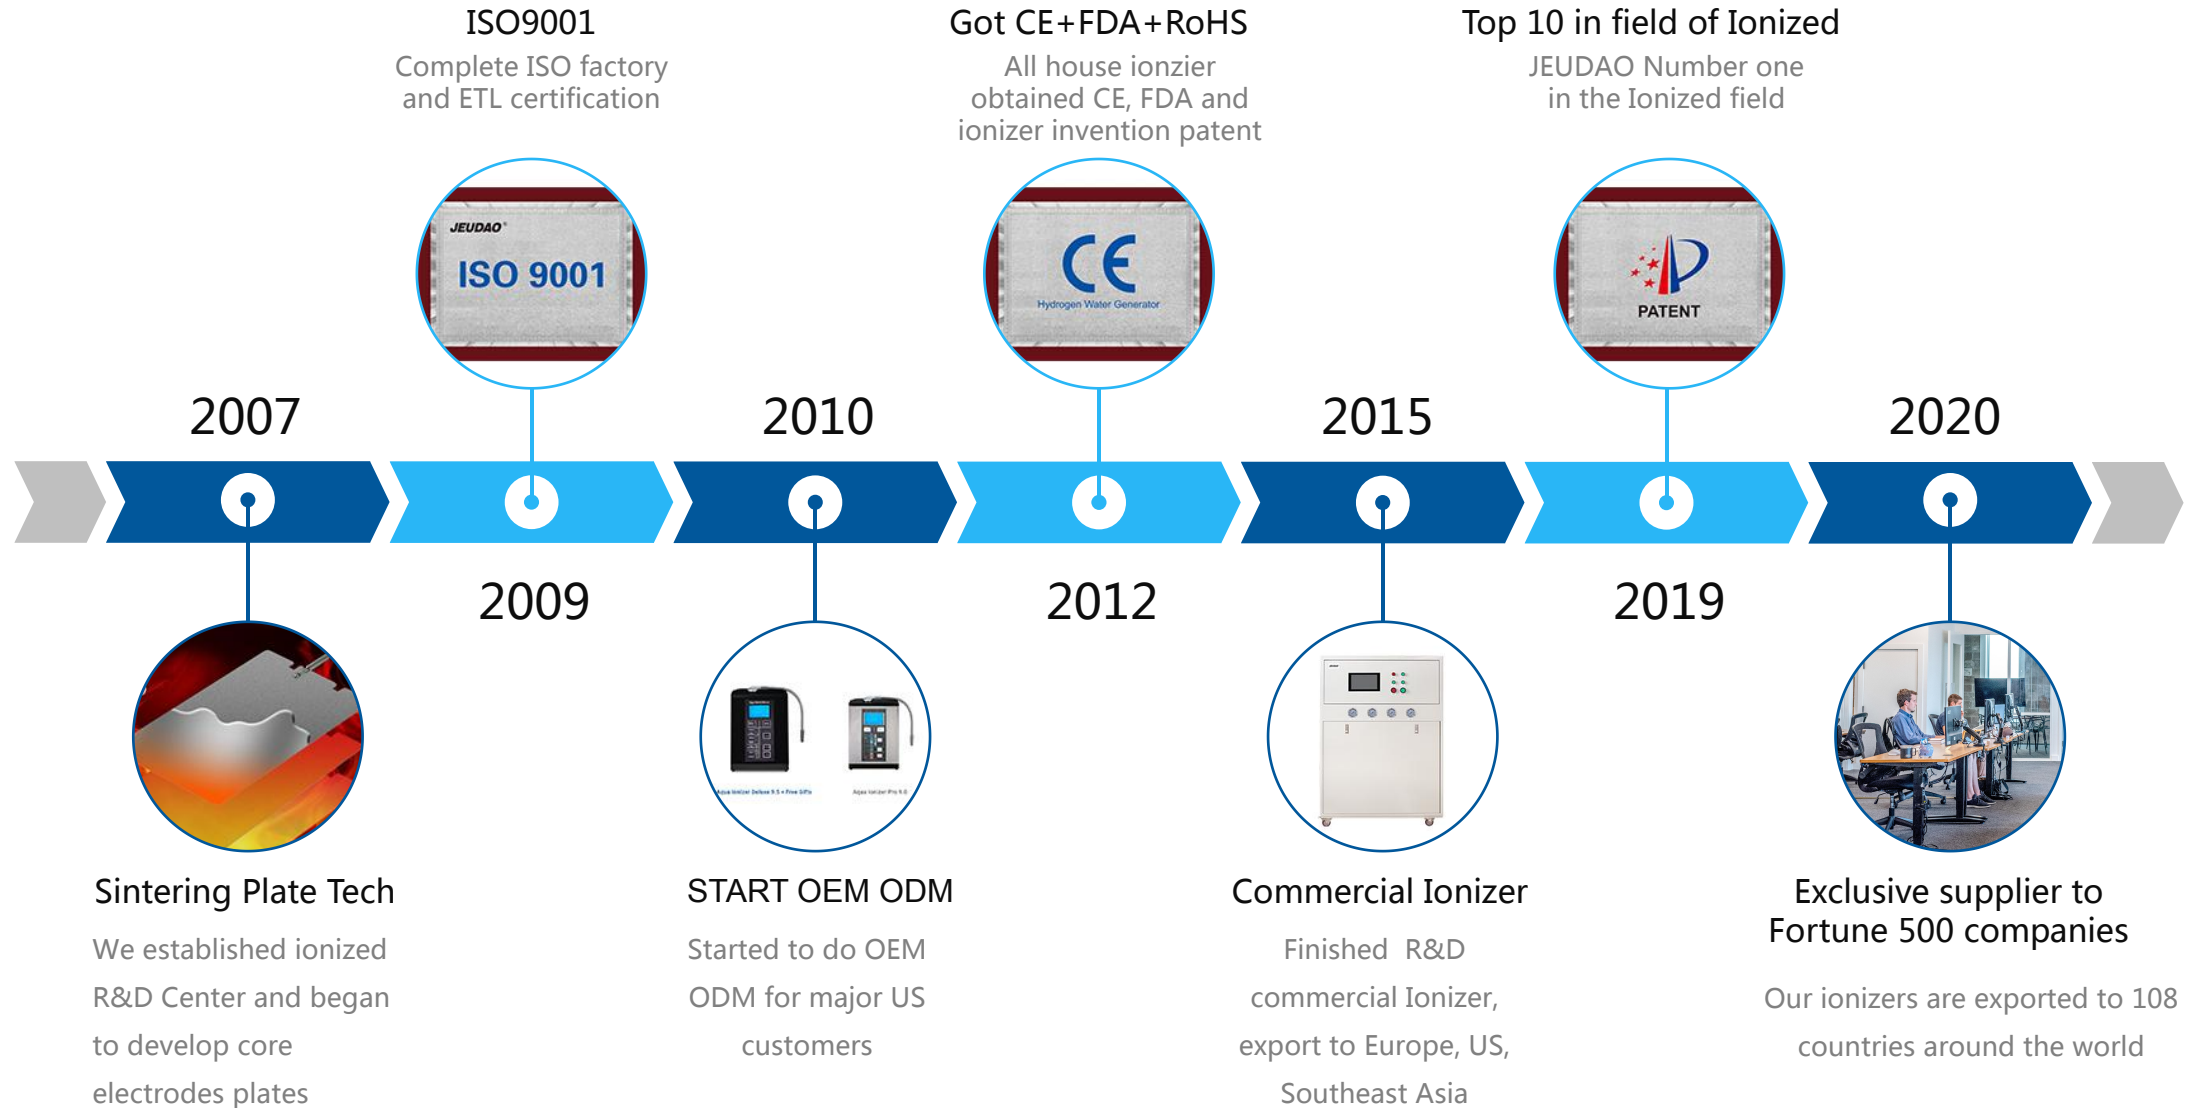

## PROFILE

Our company was established in 2007 , so we have roughly 15 years'experience in the Alkaline hydrogen Ionized field.Originally , we only had a small factory with 20 people with sales turnover of only \$13000.However ,However,over the past 15 years , we have expanded rapidly.The industry covers household appliances, medical care, animal husbandry, organic farming and other fields.Now we have 200 workers in our own factory and 50 staff belonging to several teams in our branch.And our business is still growing . The sales turnover last year was 10 million US dollars for our Ionizer

Our products have been sold worldwide . Our primary markets are in the U.S. , Germany , Canada , France , the U . K ,Sweden , Japan , Holland and Belgium.The company has set up an independent research center to conduct in-depth research in the three fields of electrode materials, Ionized Hydrogen technology and purified water filter materials, and has obtained a number of invention patents. The company adheres to the corporate culture of seeking truth from facts, Sincerity Others adheres to innovation-driven, quality first, and strives to establish a long-term great cooperation industrial chain of electrolysis rich hydrogen technology with customers and suppliers, so as to continuously create value for users and contribute a green power to the society.

# HISTORY

# ◀ Certification ▶

## FDA

Our Ionizer complete machine and electrolytic have passed FDA food safety testing reports .FDA) is the highest authority in U.S. for food safety inspection.

## CE

Our water ionizer has been exported to European, the electric,material and cartridge meet the EU standard

## RoHS

The ROHS standard means that the ionizer is broken and that it will not produce any harmful substances to the environment for 100

## ETL

ETL is one of the most authoritative certifications in North America. Ionizer with ETL is one of the only appliances covered by insurance companies in US.

## PSE

PSE certification is a Japanese product safety mark, a safety certification that must be passed to enter the Japanese market

## TUV

The TUV mark is safety certification formulated by Germany for component products.If have the TUV mark, the whole machine can be exempted from inspection when entering Germany.

### Test Verification of Conformity

On the basis of the referenced test report(s), sample(s) of the below product have been found to comply with the harmonized standards and deviation listed on this verification at the time the tests were carried out. Other standards and Directives may be relevant to the product.

The manufacturer may affix the PSE circle marking to products identical to the tested sample(s) if the product complies with Electrical Appliance and Material Safety Law of Japan.

# ◀ Hydrogen Series G-H201 ▶

H2 ≥2000ppb

Name: High concentration hydrogen water machine

Model: G-H201

Power supply: 110-220V 50-60Hz

Power: 1500W

Out case: Steel plate

Water source pressure: 0.2-0.4MPa

Flow rate: ≥2L/min

Size: 650\*550\*1350mm

Water source: tap water

Built-in filtration system

Hydrogen concentration: ≥2000ppb

pH: ≥7.5

Ultrafiltration+GAC +Carbon Block ( heavy metal ) +Nanofiltration+UV

# Disinfection Series

FAC: 10-60mg/L

Hypochlorous acid water

Strong bactericidal capacity

Nontoxic by acute oral toxicity test

No residue to the environment 99.99%+ remove bacteria, Low concentration of chlorine no irritation

pH: 5.0-6.5

Available chlorine: 10-60mg/L

Killing microorganism category:

1. To escherichia coli, staphylococcus albicans, staphylococcus aureus Candida Albicans has the killing effect

2. To H1N1 influenza virus, poliovirus has inactivated

# Testing Series

# ◀ Testing series H2 drop reagent ▶

H2 drop Reagent

Name: Hydrogen blue drop reagent

Capacity: 10ml

Storage temperature:  $22 \pm 2^\circ\text{C}$

Bottle material: Glass

Weight: NW 0.13kg / GW 0.16kg

Save the environment Keep away from light

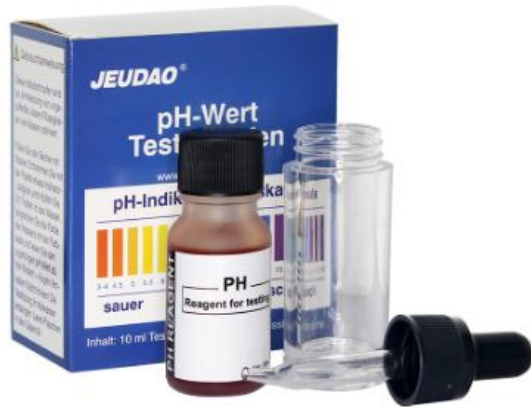

1. Our reagent bottle is made of glass, and all chemical agents need to be stored in glass, which is a common sense and valid for 36 months.

However, the reagent in Japan is made of plastic

2. We use curved glass dropper to ensure the precise amount of each drop. Japanese plastic bottle is extruded, and every drop of reagent is uneven. Our dropper is calibrated with instruments.

3. The same 10 milliliters of the same reagent, we can drop 480 drops, the Japanese can only drop 416 drops, because the amount of each drop is basically 19 milligrams, which is not a big error. The error value is very small. But the error in Japan is relatively large

# ◀ JEUDAO Laboratory ▶

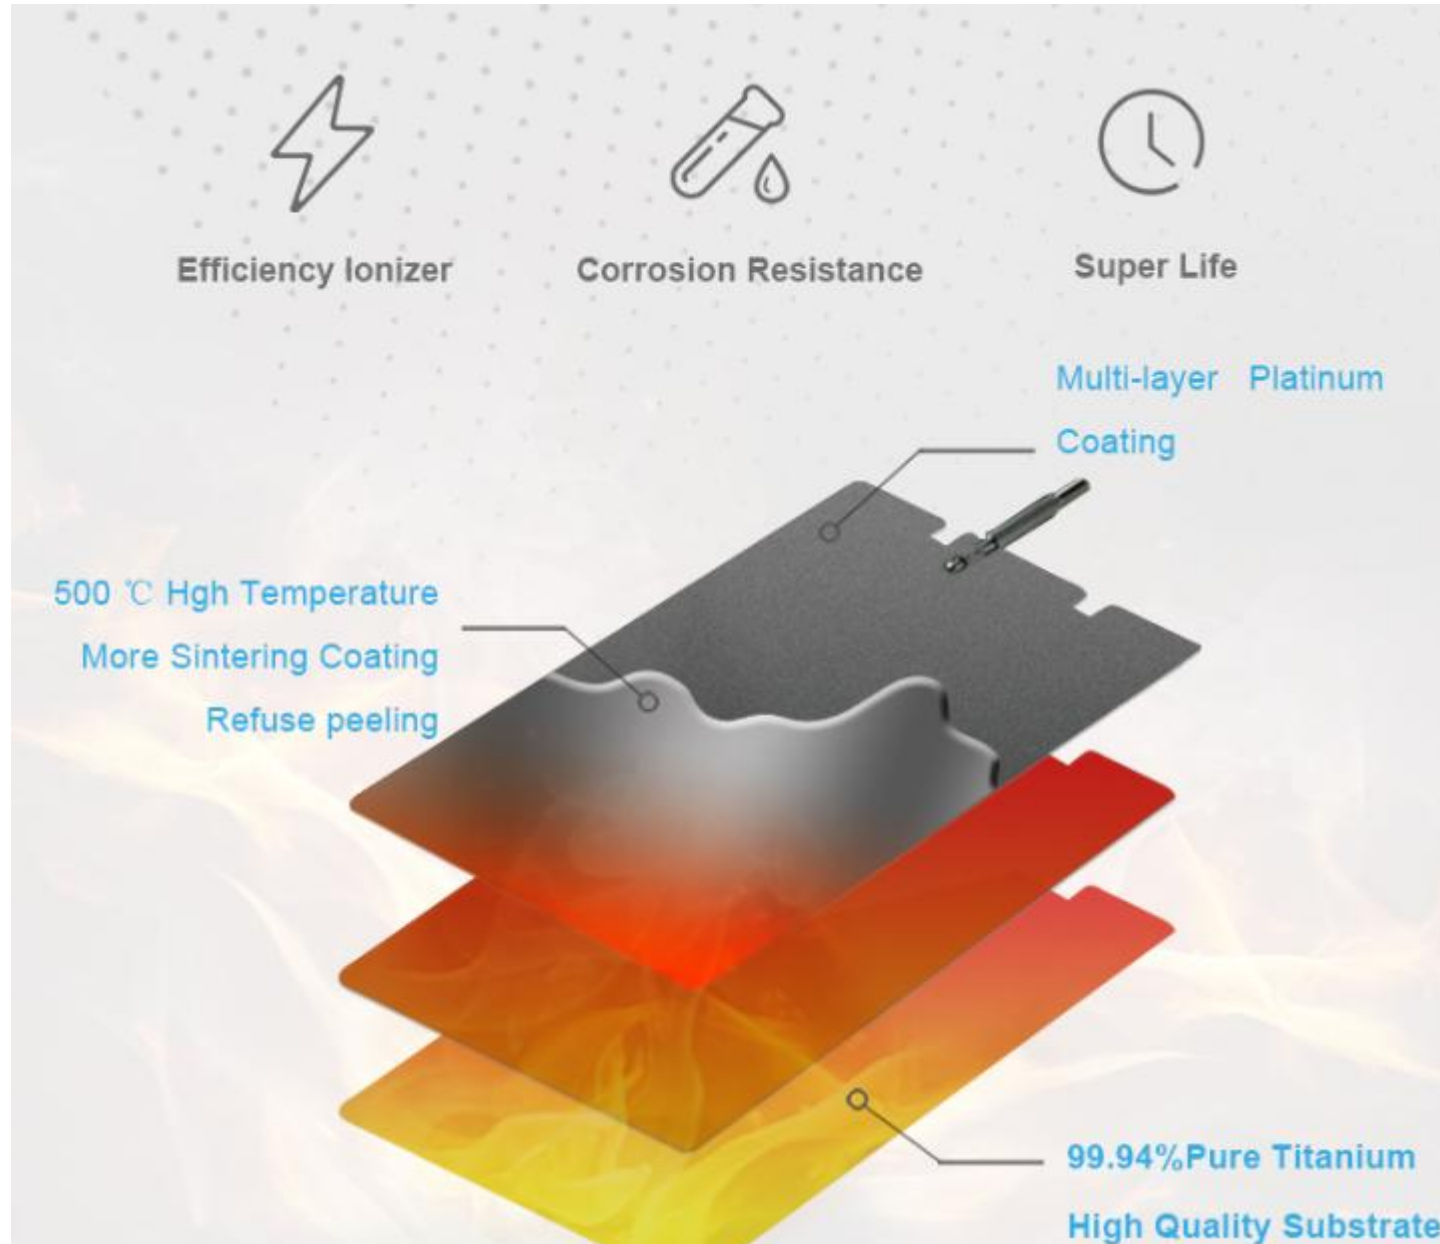

1. The JEUDAO laboratory was established in September 2011. The total laboratory area is about 200 square meters, of which the sterile area is about 80 square meters. The laboratory has a number of advanced testing equipment and professional sterile transmission windows.

2. The main functions of the laboratory are divided into physical and chemical laboratory and microbiological laboratory. The physical and chemical laboratory can detect routine items of water samples: turbidity, PH value, redox potential, visible substances, oxygen consumption, volatile phenol, etc.;

The microbiology laboratory can detect the total number of colonies, Escherichia coli, Candida albicans, etc.
