We are **Manufacturer** and **Exporter** of Analyticals, scientific instruments and laboratory equipment which are known for their simple operations and notable testing efficiency. We also provide affordable installation services.

## About Us

Established in the year **2010**, **Athena Technology**, an **ISO 9001: 2008 Certified Company** is a reputed **manufacturer, exporter and trader** of high quality scientific instruments and **laboratory equipments**. Our unparalleled array of products includes **Nitrogen Evaporator, Nitrogen Gas Generator and Hydrogen Gas Generator**. Under the brand name Athena, our products are known for their high efficiency, unmatched reliability, high durability, proven performance. Our instruments finds application in Research Labs, Colleges, Schools and various industries like Life sciences, Chemical, Petrochemical, Semiconductor, Pharmaceutical and Environmental. Moreover, we export our products to **European Countries, Middle East, South East Asia, Africa and USA**. In the future we hope to keep on contribution towards building a more affluent human society by providing the customers with innovation products, best quality and perfect Installation Services.

The infrastructure that we have set up for manufacturing our products is highly advanced and well equipped with modern technologies. The unit is segregated with several in-house departments like production, quality control, sales & marketing. All the high-tech machinery in our unit is handled by a team of skilled professionals. Their rich domain expertise and ability enable us to complete the exact requirements of our prestigious clients within the set time limit. Quality is of immense...
