2. Water Treatment Systems

3. Air Compressor

4. Pneumatic Tools

5. Pumping Systems

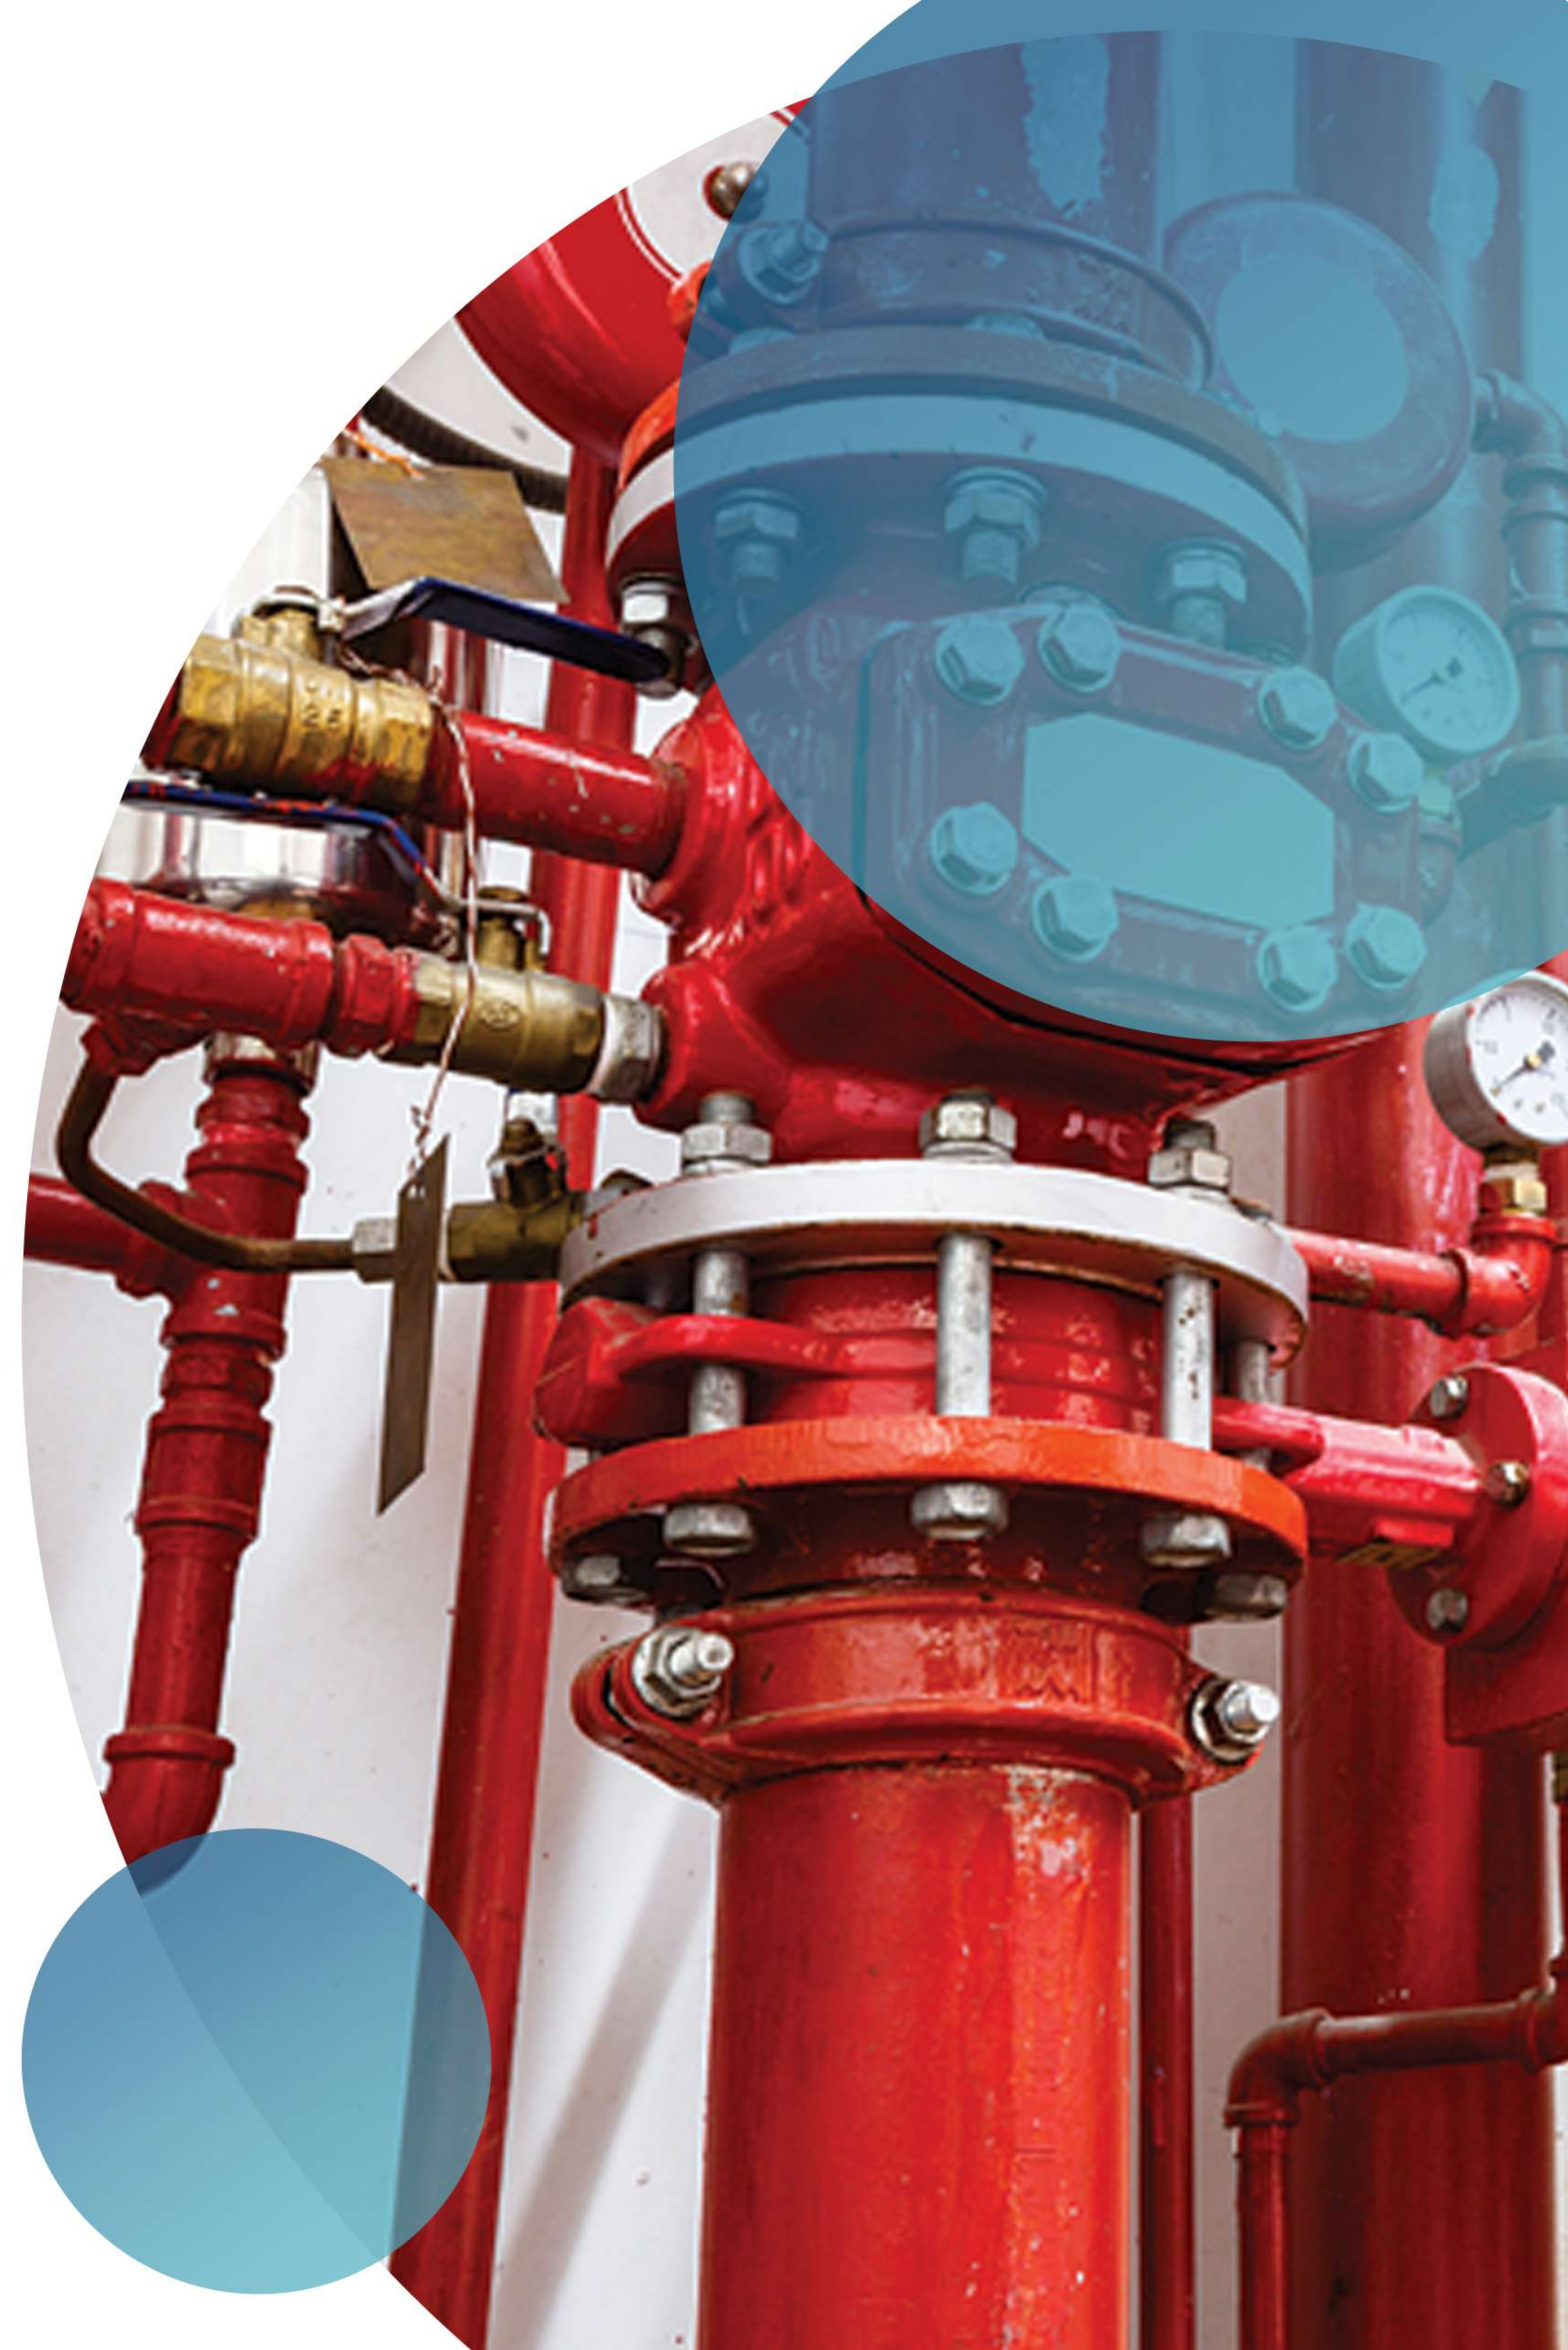

EARTHLINK

Fire safety systems

Either it is a real estate or a manufacturing unit, fire safety systems are an integral part to ensure a secure functioning environment.

To ensure the highest safety who better than Earthlink can assist you with the installation and maintenance for the fire safety systems of your need. Our mission to serve for the better of humanity sets us apart from other contractors.

1.

Fire Alarm System

Fire alarm systems with world class sensors & detectors that warns you before fire outbreak happens.

2.

Fire Suppression System

Finely engineered group of units that are built to extinguish fires through the application of a substance

3.

Fire Extinguishers

Fire extinguisher is an active fire protection device used to extinguish or control small fires, often in emergency situations.

4.

Fire Hydrant System

Carefully designed emergency equipment required in buildings that comprises a series of components to provide a source of water.

5.

Annual Maintenance Contract

We don't leave you at the installation to hang out dry. We have a team of professionals to make sure you get proper support and maintenance for fire safety systems.

EARTHLINK

Water Treatment systems

Earthlink being a prominent partner for industrial needs possess the full potential to install water treatment systems for your needs.

Either it is WTP, STP, or ETP we are equipped with the latest technology and expert manpower to solve your water treatment plant problems.

1.

Water Treatment Plant

Automation of water treatment plant is done which involves the control system opening and closing valves and starting and stopping equipment in predefined sequences to complete specific tasks for desired output.

2.

Effluent Treatment Plant

ETP (Effluent Treatment Plant) is a process design for treating the industrial waste water for its reuse or safe disposal to the environment.

3.

Sewage Treatment Plant

Sewage treatment is a type of wastewater treatment which aims to remove contaminants from sewage to produce an effluent that is suitable for discharge to the surrounding environment or an intended reuse application.

4.

Operation & Maintenance

With a dedicated team of professionals we aim to provide you with the highest level of assistance possible for the operation & maintenance of WTP.

Air Compressor Systems

With a trusted partner like Chicago Pneumatic which has a 120 year legacy & Prince PPRC pipes we never fail to perfectly deliver any kind of air compressor needs and requirements for our clients.

Our air compressor solutions & piping partner
