FATC Demulsifier BAC-80

Product Description:

FATC Demulsifier BAC-80 is a 80 % active Alkyl Benzyl Dimethyl Ammonium Chloride in aqueous solution.

CAS Number: 68424-85-1
8001-54-5

Typical Properties:

Form:	Liquid
Color:	Colorless – pale yellow
Clarity:	Clear
Active content:	78 – 80 %
pH (5% solution):	6.0 – 8.0
Specific Gravity:	0.95 – 0.99 @ 25°C
Amine value:	2 mg KOH / g maximum
Flash point:	> 100°C
Alkyl distribution:	Predominantly C12C14 Soluble in water, glycols
Solubility:	

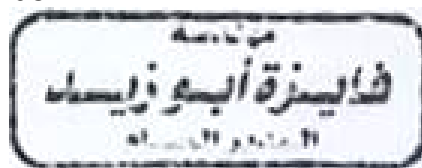

* These do not constitute a specification

Product Application:

Fatc Demulsifier BAC-80 can be used as a component in corrosion inhibitor and biocide formulations for application in oilfield, water treatment and other industrial applications.

Used as an antibacterial, algacide, fungicide, deodorizing and antistatic agent.

It is compatible with cationic, nonionic and amphoteric at proper pH range as well as alkaline and acid inorganics and most mineral and organic acids.
